# WFD, where are we ?

Good status in  
2027 ?

Comparison of  
water bodies

# Towards a review in

## « Thoughtstarter »

- 1. What will be beyond 2027 ?**
- 2. Communication on progress : one out all out ?**
- 3. Public participation ?**
- 4. Cost recovery ?**
- 5. Chemicals ?**
- 6. Clever mmonitoring better integrated with other directives**
- 7. Harmonization of the directives : timing, ambitions...**

# Check up

<i>Strengths</i>	<i>Weaknesses</i>
<ul style="list-style-type: none"><li>- Basin management,</li><li>- Cost recovery,</li><li>- Planification,</li><li>-Wellbeing of the ecosystem,</li><li>- clear objectives.</li></ul>	<ul style="list-style-type: none"><li>- High level of complexity,</li><li>- Bad assessment at the starting point,</li><li>- No assessment of the progress done.</li></ul>
<i>Opportunities</i>	<i>Threats</i>
<ul style="list-style-type: none"><li>- Make the implementation easier,</li><li>- Mainstreaming of the WFD objectives : agriculture, energy, transportation...</li><li>- Take into account the climate change.</li></ul>	<ul style="list-style-type: none"><li>- Infringement risks,</li><li>- Political debate : loss of the environmental l'ambition,</li><li>- Timeframe to get the results of the measures taken,</li><li>- Mobilization of the stakeholders</li></ul>

# France : a carefully approach

- ***An adverse european context :***
  - Economics,
  - Migrants crisis...
- ***Stand back from technical problems :***
  - Responsability of the Member States vs European Union,
    - The entire solution won't come from Brussels,
    - Subsidiarity principle.
  - Provide a new momentum to the european water policy :
    - Give a political vision,
    - Remind the global objectives : water for all, in quantity, in a good quality at the lower price and sustainably managed,
    - New tools : european funds, innovative projects...
